This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

TITLE PAGE

**A MODEL TO IDENTIFY INDIVIDUALS AT HIGH RISK FOR
ESOPHAGEAL SQUAMOUS CELL CARCINOMA AND PRECANCEROUS
LESIONS IN REGIONS OF HIGH PREVALENCE IN CHINA**

Short Title

A model to identify high risk individuals for ESCC, China
