The Effect of Microbiota and the Immune System on the Development and Organization of the Enteric Nervous System

Yuuki Obata, Vassilis Pachnis

PII: S0016-5085(16)34896-X
DOI: [10.1053/j.gastro.2016.07.044](https://doi.org/10.1053/j.gastro.2016.07.044)
Reference: YGAST 60621

To appear in: *Gastroenterology*
Accepted Date: 7 July 2016

Please cite this article as: Obata Y, Pachnis V, The Effect of Microbiota and the Immune System on the Development and Organization of the Enteric Nervous System, *Gastroenterology* (2016), doi: 10.1053/j.gastro.2016.07.044.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

20

21

22 **Contents**

23 ***Introduction***

24 ***Genetic programs that control ENS development***

25 ***The role of gut microbial factors on the development and homeostasis of the ENS***

26 ***1. Toll-like receptor (TLR) ligands***

27 ***2. Short chain fatty acids (SCFAs)***

28 ***3. Bile acid metabolism and dietary factors***

29 ***Bi-directional communication between the gut immune system and ENS***

30 ***Parkinson's disease: a disease of the Microbiota-Gut-Brain axis?***

31 ***Conclusion and future perspective***
