Estrogen Signals through PPARG coactivator 1 alpha to Reduce Oxidative Damage Associated with Diet-induced Fatty Liver Disease

Aurèle Besse-Patin, Mélissa Léveillé, Daniel Oropeza, Bich N. Nguyen, Annick Prat, Jennifer L. Estall

PII: S0016-5085(16)35111-3
DOI: [10.1053/j.gastro.2016.09.017](https://doi.org/10.1053/j.gastro.2016.09.017)
Reference: YGAST 60708

To appear in: *Gastroenterology*
Accepted Date: 15 September 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Estrogen Signals through PPAR γ coactivator 1 α to Reduce Oxidative Damage Associated
with Diet-induced Fatty Liver Disease
