This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Revised paper CLM-16-11021.R1 [clean copy]

Title page

Intended category: Original article

Complete title: Impact of fluconazole susceptibility on the outcome of patients with candidemia: data from a population-based surveillance.

Running title: Fluconazole susceptibility and outcome in candidemia.

Authors' affiliations:

Mario Fernández-Ruiz, MD¹; Jesús Guinea, PharmD, PhD²; David Lora-Pablos^{3,4}; Óscar Zaragoza, PhD⁵; Mireia Puig-Asensio, MD, PhD⁶; Benito Almirante, MD, PhD⁶; Manuel Cuenca-Estrella, MD, PhD⁵; and José María Aguado, MD, PhD¹, on behalf of the CANDIPOP Project*, GEIH-GEMICOMED (SEIMC) and REIPI.
