Intranasal administration of a polyvalent bacterial lysate induces self-restricted inflammation in the lungs and a Th1/Th17 memory signature

Analía Rial, Florencia Ferrara, Norma Suárez, Paola Scavone, Juan Martín Marqués, José Alejandro Chabalgoity

PII: S1286-4579(16)30165-4

DOI: [10.1016/j.micinf.2016.10.006](https://doi.org/10.1016/j.micinf.2016.10.006)

Reference: MICINF 4437

To appear in: *Microbes and Infection*

Received Date: 26 February 2016

Revised Date: 10 October 2016

Accepted Date: 16 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
