

## Keyword index

### A

- Acinetobacter baumannii** – *Acinetobacter baumannii* and *A. pittii* clinical isolates lack adherence and cytotoxicity to lung epithelial cells *in vitro*, 559
- Acinetobacter pittii** – *Acinetobacter baumannii* and *A. pittii* clinical isolates lack adherence and cytotoxicity to lung epithelial cells *in vitro*, 559
- Acute phase response** – Almroth Wright, opsonins, innate immunity and the lectin pathway of complement activation: a historical perspective, 450
- Adherence** – Expression of *Mycobacterium tuberculosis* NLPC/p60 family protein Rv0024 induce biofilm formation and resistance against cell wall acting anti-tuberculosis drugs in *Mycobacterium smegmatis*, 224 – *Acinetobacter baumannii* and *A. pittii* clinical isolates lack adherence and cytotoxicity to lung epithelial cells *in vitro*, 559
- Adhesion** – Infection of human keratinocytes by *Streptococcus dysgalactiae* subspecies *dysgalactiae* isolated from milk of the bovine udder, 290
- Adipose tissue** – Antagonistic effect of atorvastatin on high fat diet induced survival during acute Chagas disease, 675
- Adjuvant** – TLR 9 involvement in early protection induced by immunization with rPb27 against *Paracoccidioidomycosis*, 137
- Aedes aegypti** – Autophagy and viral diseases transmitted by *Aedes aegypti* and *Aedes albopictus*, 169
- Aggregation** – Almroth Wright, opsonins, innate immunity and the lectin pathway of complement activation: a historical perspective, 450
- Aging** – Centenary of the death of Elie Metchnikoff: a visionary and an outstanding team leader, 577
- Airway epithelial cells** – *Neisseria* internalization by epithelial cells is enhanced by TLR2 stimulation, 627
- Alphavirus** – Mayaro virus: a forest virus primed for a trip to the city?, 724
- Alveolar macrophage** – GM-CSF has intradrate roles during intranasal and intradermal *Francisella tularensis* infection, 758
- Anemia** – Dynamic control of hepatic *Plasmodium* numbers by hepcidin despite elevated liver iron during iron supplementation, 48
- Anthrax toxin** – *Bacillus anthracis* spore movement does not require a carrier cell and is not affected by lethal toxin in human lung models, 615

- Antibody-dependent enhancement** – Dengue virus infection-enhancing antibody activities against Indonesian strains in inhabitants of central Thailand, 277
- Antigens** – Computational modeling of TC0583 as a putative component of the *Chlamydia muridarum* V-type ATP synthase complex and assessment of its protective capabilities as a vaccine antigen, 245
- Antimicrobial proteins** – Autonomous immunity in mucosal epithelial cells: fortifying the barrier against infection, 387
- Antimicrobial resistance** – Expression of *Mycobacterium tuberculosis* NLPC/p60 family protein Rv0024 induce biofilm formation and resistance against cell wall acting anti-tuberculosis drugs in *Mycobacterium smegmatis*, 224
- Antiviral agents** – Identification of innate immune antiretroviral factors during *in vivo* and *in vitro* exposure to HIV-1, 211 – Antiviral molecules correlate with vitamin D pathway genes and are associated with natural resistance to HIV-1 infection, 510
- Antiviral therapy** – A randomized open-label clinical trial of an anti-HPV biological dressing (JB01-BD) administered intravaginally to treat high-risk HPV infection, 148
- Apicomplexa** – Extracellular *Toxoplasma gondii* tachyzoites metabolize and incorporate unnatural sugars into cellular proteins, 199
- Arbovirus** – Zika virus: epidemiology, clinical features and host-virus interactions, 441 – Mayaro virus: a forest virus primed for a trip to the city?, 724
- Argentina** – Prevalence and infection intensity of *Rickettsia massiliae* in *Rhipicephalus sanguineus sensu lato* ticks from Mendoza, Argentina, 701
- Arthralgia** – Mayaro virus: a forest virus primed for a trip to the city?, 724
- Arthropod-borne virus** – Zika virus – an overview, 295
- Atypical strain** – Development of dual fluorescent stage specific reporter strain of *Toxoplasma gondii* to follow tachyzoite and bradyzoite development *in vitro* and *in vivo*, 39
- Autophagy** – Autophagy and viral diseases transmitted by *Aedes aegypti* and *Aedes albopictus*, 169 – Lipid droplets affect elimination of *Porphyromonas gingivalis* in HepG2 cells by altering the autophagy-lysosome system, 565

### B

- B cells** – *Brucella abortus*-infected B cells induce osteoclastogenesis, 529
- B-1 cell** – Infection with *Paracoccidioides brasiliensis* induces B-1 cell migration and activation of regulatory T cells, 798
- Bacillus anthracis** – *Bacillus anthracis* spore movement does not require a carrier cell and is not affected by lethal toxin in human lung models, 615
- Bacteria-containing vacuole** – Rab32/38 and the xenophagic restriction of intracellular bacteria replication, 595
- Bacterial community structure** – Resilience of the intestinal microbiota following pathogenic bacterial infection is independent of innate immunity mediated by NOD1 or NOD2, 460
- Bacterial-host interaction** – *Ehrlichia*'s molecular tricks to manipulate their host cells, 172
- Bacterial lysates** – Intranasal administration of a polyvalent bacterial lysate induces self-restricted inflammation in the lungs and a Th1/Th17 memory signature, 747
- BCG** – Post-exposure vaccination with the vaccine candidate *Bacillus Calmette-Guérin*  $\Delta$ *ureC::hly* induces superior protection in a mouse model of subclinical tuberculosis, 364
- Beta-adrenergic blocking activity** – Recombinant murine toxin from *Yersinia pestis* shows high toxicity and  $\beta$ -adrenergic blocking activity in mice, 329
- Bifidobacterium longum 5<sup>1A</sup>** – Control of *Klebsiella pneumoniae* pulmonary infection and immunomodulation by oral treatment with the commensal probiotic *Bifidobacterium longum* 5<sup>1A</sup>, 180
- Biofilm** – Expression of *Mycobacterium tuberculosis* NLPC/p60 family protein Rv0024 induce biofilm formation and resistance against cell wall acting anti-tuberculosis drugs in *Mycobacterium smegmatis*, 224 – *Candida albicans* biofilms: development, regulation, and molecular mechanisms, 310
- BMP** – Expression and role of the TGF- $\beta$  family in glial cells infected with Borna disease virus, 128
- Borna disease virus** – Expression and role of the TGF- $\beta$  family in glial cells infected with Borna disease virus, 128
- Borrelia burgdorferi** – Statins reduce spirochetal burden and modulate immune responses in the C3H/HeN mouse model of Lyme disease, 430 – Pleomorphic forms of *Borrelia burgdorferi* induce distinct immune responses, 484

- Bovine** – Infection of human keratinocytes by *Streptococcus dysgalactiae* subspecies *dysgalactiae* isolated from milk of the bovine udder, 290
- Bradyzoite** – Development of dual fluorescent stage specific reporter strain of *Toxoplasma gondii* to follow tachyzoite and bradyzoite development *in vitro* and *in vivo*, 39
- Brain disorders** – Infection and characterization of *Toxoplasma gondii* in human induced neurons from patients with brain disorders and healthy controls, 153
- Brain endothelium** – Cryptococcal transmigration across a model brain blood-barrier: evidence of the Trojan horse mechanism and differences between *Cryptococcus neoformans* var. *grubii* strain H99 and *Cryptococcus gattii* strain R265, 57
- Brucella abortus** – *Brucella abortus*-infected B cells induce osteoclastogenesis, 529
- Burkholderia** – Melioidosis: a greater threat than previously suspected?, 661
- C**
- CAMP factor** – *Streptococcus pyogenes* CAMP factor attenuates phagocytic activity of RAW 264.7 cells, 118
- Cancer** – Cytotoxic *Escherichia coli* strains encoding colibactin colonize laboratory mice, 777
- Candida albicans** – *Candida albicans* biofilms: development, regulation, and molecular mechanisms, 310 – TLR2, TLR4 and Dectin-1 signalling in hematopoietic stem and progenitor cells determines the antifungal phenotype of the macrophages they produce, 354 – TLR2 modulates gut colonization and dissemination of *Candida albicans* in a murine model, 656
- Cardiomyopathy** – Antagonistic effect of atorvastatin on high fat diet induced survival during acute Chagas disease, 675
- Caspase-1** – Is the inflammasome relevant for epithelial cell function?, 93
- CD8<sup>+</sup> T cells** – CD8<sup>+</sup> T cells remove cysts of *Toxoplasma gondii* from the brain mostly by recognizing epitopes commonly expressed by or cross-reactive between type II and type III strains of the parasite, 517 – IL-2 complex treatment amplifies CD8<sup>+</sup> T cell mediated immunity following herpes simplex virus-1 infection, 735
- Cell death** – Innate immunity in tuberculosis: how the sensing of mycobacteria and tissue damage modulates macrophage death, 11 – 1,3,4-Thiadiazole derivatives of *R*-(+)-limonene benzaldehyde-thiosemicarbazones cause death in *Trypanosoma cruzi* through oxidative stress, 787
- Cell repair** – Is the inflammasome relevant for epithelial cell function?, 93
- Cell signaling** – Autonomous immunity in mucosal epithelial cells: fortifying the barrier against infection, 387
- Cell wall biogenesis** – Statins reduce spirochetal burden and modulate immune responses in the C3H/HeN mouse model of Lyme disease, 430
- Cellular microbiology** – 1926–2016: 90 Years of listeriology, 711
- Cervical cancer** – A randomized open-label clinical trial of an anti-HPV biological dressing (JB01-BD) administered intravaginally to treat high-risk HPV infection, 148
- Chagas disease** – Antagonistic effect of atorvastatin on high fat diet induced survival during acute Chagas disease, 675 – 1,3,4-Thiadiazole derivatives of *R*-(+)-limonene benzaldehyde-thiosemicarbazones cause death in *Trypanosoma cruzi* through oxidative stress, 787
- Chikungunya virus** – Autophagy and viral diseases transmitted by *Aedes aegypti* and *Aedes albopictus*, 169
- Children** – Development and maturation of norovirus antibodies in childhood, 263
- Chlamydia** – The p<sup>47</sup>phox deficiency significantly attenuates the pathogenicity of *Chlamydia muridarum* in the mouse oviduct but not uterine tissues, 190 – IRE1 $\alpha$  mediates PKR activation in response to *Chlamydia trachomatis* infection, 472
- Chlamydia caviae** – Infectious dose and repeated infections are key factors influencing immune response characteristics in guinea pig ocular chlamydial infection, 254
- Chlamydia trachomatis** – Computational modeling of TC0583 as a putative component of the *Chlamydia muridarum* V-type ATP synthase complex and assessment of its protective capabilities as a vaccine antigen, 245
- Cholera** – Biochemical and full genome sequence analyses of clinical *Vibrio cholerae* isolates in Mexico reveals the presence of novel *V. cholerae* strains, 322
- Chronic colitis model** – Resilience of the intestinal microbiota following pathogenic bacterial infection is independent of innate immunity mediated by NOD1 or NOD2, 460
- Clec4d** – Signalling through MyD88 drives surface expression of the mycobacterial receptors MCL (Clec3f8, Clec4d) and Mincle (Clec4e) following microbial stimulation, 505
- Clec4e** – Signalling through MyD88 drives surface expression of the mycobacterial receptors MCL (Clec3f8, Clec4d) and Mincle (Clec4e) following microbial stimulation, 505
- “Click” chemistry** – Extracellular *Toxoplasma gondii* tachyzoites metabolize and incorporate unnatural sugars into cellular proteins, 199
- Clinical trial** – A randomized open-label clinical trial of an anti-HPV biological dressing (JB01-BD) administered intravaginally to treat high-risk HPV infection, 148
- Clostridium difficile** – High fecal IgA is associated with reduced *Clostridium difficile* colonization in infants, 543
- Clostridium difficile infection** – Identification of key taxa that favor intestinal colonization of *Clostridium difficile* in an adult Chinese population, 30
- Clostridium species** – Roles of transcription factors and epigenetic modifications in differentiation and maintenance of regulatory T cells, 378
- Co-infection** – Burden and viral aetiology of influenza-like illness and acute respiratory infection in intensive care units, 270
- Colibactin** – Cytotoxic *Escherichia coli* strains encoding colibactin colonize laboratory mice, 777
- Colocalization** – Pleomorphic forms of *Borrelia burgdorferi* induce distinct immune responses, 484
- Combination adjuvant** – Mucosal delivery of a combination adjuvant comprising emulsified fine particles and LD-indolicidin enhances serological immunity to inactivated influenza virus, 706
- Conversion** – Development of dual fluorescent stage specific reporter strain of *Toxoplasma gondii* to follow tachyzoite and bradyzoite development *in vitro* and *in vivo*, 39
- Coxiella burnetii** – Modulation of the host transcriptome by *Coxiella burnetii* nuclear effector Cbu1314, 336
- CPAF** – Neutralizing antichlamydial activity of complement by chlamydia-secreted protease CPAF, 669
- CPG** – TLR 9 involvement in early protection induced by immunization with rPb27 against Paracoccidioidomycosis, 137
- CRF01\_AE** – Neutralization breadth and potency of serum derived from recently human immunodeficiency virus type 1-infected Thai individuals, 346
- Cryptococcus** – Cryptococcal transmigration across a model brain blood-barrier: evidence of the Trojan horse mechanism and differences between *Cryptococcus neoformans* var. *grubii* strain H99 and *Cryptococcus gattii* strain R265, 57
- CTLA-4** – Surface expression of inhibitory (CTLA-4) and stimulatory (OX40) receptors by CD4<sup>+</sup> regulatory T cell subsets circulating in human malaria, 639
- C-type lectin receptor** – Signalling through MyD88 drives surface expression of the mycobacterial receptors MCL (Clec3f8, Clec4d) and Mincle (Clec4e) following microbial stimulation, 505
- CXCL8** – Role of the *Yersinia* YopJ protein in suppressing interleukin-8 secretion by human polymorphonuclear leukocytes, 21
- Cyst** – Development of dual fluorescent stage specific reporter strain of *Toxoplasma gondii* to follow tachyzoite and bradyzoite development *in vitro* and *in vivo*, 39 – Infection and characterization of *Toxoplasma gondii* in human induced neurons from patients with brain disorders and healthy controls, 153 – Use of human induced pluripotent stem cell-derived neurons as a model for Cerebral Toxoplasmosis, 496 – CD8<sup>+</sup> T cells remove cysts of *Toxoplasma gondii* from the brain mostly by recognizing epitopes commonly expressed by or cross-reactive between type II and type III strains of the parasite, 517
- Cytokines** – Trypanosome-induced Interferon- $\gamma$  production in whole blood stimulation assays is associated with latent *Trypanosoma brucei gambiense* infections, 436 – Adaptive immune response in symptomatic and asymptomatic enteric protozoal infection: evidence for a determining role of parasite genetic heterogeneity in host immunity to human giardiasis, 687
- Cytotoxicity** – *Acinetobacter baumannii* and *A. pittii* clinical isolates lack adherence and cytotoxicity to lung epithelial cells *in vitro*, 559 – Cytotoxic *Escherichia coli* strains encoding colibactin colonize laboratory mice, 777
