This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

*Aniba canelilla* essential oil  
possesses *in vitro* trypanocidal action

The majoritary compounds may be considered  
responsible by the trypanocidal action

Association between compounds at 2 % decreased  
lymphocyte cell viability

These treatments may be considered an important  
alternative when comproved your *in vivo* action
