Extracellular polysaccharide derived from potential probiotic strain with antioxidant and antibacterial activities as a prebiotic agent to control pathogenic bacterial biofilm formation

Abdelkarim Mahdhi, Nadia Leban, Ibtissem Chakroun, Mohamed Aymen Chaouch, Jawhar Hafsa, Kais Fdhila, Kacem Mahdouini, Hatem Majdoub

PII: S0882-4010(16)30517-4

DOI: [10.1016/j.micpath.2017.05.046](https://doi.org/10.1016/j.micpath.2017.05.046)

Reference: YMPAT 2290

To appear in: *Microbial Pathogenesis*

Received Date: 1 September 2016

Revised Date: 1 May 2017

Accepted Date: 30 May 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 Extracellular polysaccharide derived from potential probiotic strain with antioxidant and  
2 antibacterial activities as a prebiotic agent to control pathogenic bacterial biofilm formation
