This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

In vivo uteroplacental release of placental growth factor and soluble Fms-like tyrosine kinase-1 in normal and preeclamptic pregnancies

Ane M. HOLME, MD, Department of Obstetrics, Oslo University Hospital Rikshospitalet, Oslo, Norway

Marie C. P. ROLAND, MD, PhD, Department of Obstetrics, Oslo University Hospital and Vestre Viken Hospital Trust, Oslo

Tore HENRIKSEN, MD, PhD, Department of Obstetrics, Oslo University Hospital Rikshospitalet, Oslo, Norway, University of Oslo, Oslo, Norway

Trond M. MICHELSEN, MD, PhD, Department of Obstetrics, Oslo University Hospital Rikshospitalet, Oslo, Norway, Norwegian National Advisory Unit on Women's Health, Oslo University Hospital, Oslo, Norway.

The authors report no conflicts of interest

The South-Eastern Norway Regional Health Authority (grant number 2013043, A.M.H) and the Norwegian National Advisory Unit on Women's Health (T.M.M) provided financial support to conduct the research. The funders had no involvement in the study design, data collection, analyses, or interpretation. Further, they were not involved in the writing or the decision to publish this paper.

Some of the findings included in this paper were presented at the XIX World Congress of the International Society for the Study of Hypertension in Pregnancy, New Orleans, Louisiana, October 26–29, 2014.
