An exploratory study of the influence of posture and hand task on corticomotor excitability of upper extremity muscles after stroke

Caroline IE. Renner, MD PhD, Sophia Hanna, MD, Ricarda Ludwig, Balazs Lukats, MD, Horst Hummelsheim, MD, PhD

PII: S0003-9993(17)30029-1

DOI: [10.1016/j.apmr.2016.12.019](https://doi.org/10.1016/j.apmr.2016.12.019)

Reference: YAPMR 56778

To appear in: *ARCHIVES OF PHYSICAL MEDICINE AND REHABILITATION*

Received Date: 19 April 2016

Revised Date: 23 December 2016

Accepted Date: 23 December 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

An exploratory study of the influence of posture and hand task on corticomotor excitability of upper extremity muscles after stroke

Caroline IE Renner MD PhD, Sophia Hanna MD, Ricarda Ludwig, Balazs Lukats MD, Horst Hummelsheim MD, PhD.

NRZ Neurological Rehabilitation Center
University of Leipzig, Germany

Running title: posture and task after stroke

Key words: corticospinal excitability, hemiparesis, postural stability, stroke, transcranial magnetic stimulation,

Address for correspondence and where the study was performed:

Caroline I.E. Renner
Neurological Rehabilitation Centre
University of Leipzig
Muldenttalweg 1
D-04828 Bennewitz bei Leipzig
Tel. : ++49/3425/888-497
FAX: ++49/3425/888-877
E-Mail: renner@sachsenklinik.de

Acknowledgements

We wish to thank Prof. Miles Brennan for his comments on the manuscript and Dr. Christoph Engel from the Institute of Medical Informatics, Statistics and Epidemiology of University Leipzig for statistical advice.
