This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Matching task-difficulty to patient-ability during task practice improves upper extremity motor skill after stroke: a proof of concept study

Authors:

Michelle L. Woodbury, PhD, OTR/L^{1,2,3}; Kelly Anderson, MS, OTR/L²; Christian Finetto, PhD²; Andrew Fortune, BS^{1,2}; Blair Dellenbach, MS, OTR/L²; Emily Grattan, PhD, OTR/L²; Scott Hutchison, MS, OTR/L^{1,2,3}

Author Affiliations:

¹Ralph H. Johnson Veterans Affairs Medical Center

²Medical University of South Carolina, Department of Health Science and Research

³Medical University of South Carolina, Department of Health Professions, Division of Occupational Therapy

This material was presented in part as a research paper at the American

Occupational Therapy Association national conference, Nashville TN, 2014

Acknowledgements: This study is supported in part by the Ralph H. Johnson VA Medical Center and the Office of Research and Development, Rehabilitation Research and Development, Department of Veterans Affairs; Career Development-2 (B-6332W), PI: M.L. Woodbury, and VA Merit Review Awards (N0799-R), PI: M.L. Woodbury. This work was also supported by the Medical University of South Carolina COBRE for Stroke Recovery, an Institutional Development Award (IDeA) from the National Institute of General Medical Sciences of the National Institutes of Health under grant number COBRE P20GM12345 (PIs: S. Kautz, R. Adams). The authors would like to thank MUSC Masters of Occupational Therapy students Patty Pierson, Emily Jeffers, Kelly Callahan, Hunter Faulk and Catie Lang for their assistance in data entry and analysis.

There are no conflicts of interest
