This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Running head:

Sensorimotor control in idiopathic neck pain

Title:

Sensorimotor control in individuals with idiopathic neck pain and healthy individuals:
A systematic review and meta-analysis

Authors:

Rutger M.J. de Zoete, MSc^a

Peter G. Osmotherly, PhD^a

Darren A. Rivett, PhD^a

Scott F. Farrell, PhD^{a,b}

Suzanne J. Snodgrass, PhD^a

^a School of Health Sciences, Faculty of Health and Medicine, The University of
Newcastle, Callaghan NSW 2308, Australia.

^b Recover Injury Research Centre, Menzies Health Institute Queensland, Griffith
University, Southport QLD 4222, Australia

Interim results of this research were presented at the national Australian
Physiotherapy Association conference in Gold Coast, Australia, October 3, 2015 and
at the International Federation of Orthopaedic Manipulative Physical Therapists
conference in Glasgow, Scotland, July 4, 2016.
