

# Accepted Manuscript

The association of psychosocial factors with physical activity and function after total knee replacement: An exploratory study

Gregory M. Dominick, PhD, Joseph A. Zeni, PhD, Daniel K. White, ScD

PII: S0003-9993(16)30153-8

DOI: [10.1016/j.apmr.2015.09.028](https://doi.org/10.1016/j.apmr.2015.09.028)

Reference: YAPMR 56546

To appear in: *ARCHIVES OF PHYSICAL MEDICINE AND REHABILITATION*

Received Date: 16 March 2015

Revised Date: 10 September 2015

Accepted Date: 10 September 2015

Please cite this article as: Dominick GM, Zeni JA, White DK, The association of psychosocial factors with physical activity and function after total knee replacement: An exploratory study, *ARCHIVES OF PHYSICAL MEDICINE AND REHABILITATION* (2016), doi: 10.1016/j.apmr.2015.09.028.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Running head: Influences on physical activity and function

The association of psychosocial factors with physical activity and function after total knee replacement: An exploratory study
