RNA-Seq analysis of peripheral blood mononuclear cells reveals unique transcriptional signatures associated with disease progression in dengue patients

Arup Banerjee, Shweta Shukla, Abhay Deep Pandey, Saptamita Goswami, Bhaswati Bandyopadhyay, Vishnampettai Ramachandran, Shukla Das, Arjun Malhotra, Amitesh Agarwal, Srma Adhikari, Mehebubar Rahman, Shatakshee Chatterjee, Nemai Bhattacharya, Nandita Basu, Priyanka Pandey, Vikas Sood, Sudhanshu Vrati

PII: S1931-5244(17)30216-5

DOI: [10.1016/j.trsl.2017.06.007](https://doi.org/10.1016/j.trsl.2017.06.007)

Reference: TRSL 1164

To appear in: *Translational Research*

Received Date: 7 March 2017

Revised Date: 6 June 2017

Accepted Date: 8 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Revision 2**

2 **RNA-Seq analysis of peripheral blood mononuclear cells reveals unique transcriptional**  
3 **signatures associated with disease progression in dengue patients**

4 **Running Title:** Transcriptome signatures linked to dengue disease progression
