Mesencephalic astrocyte-derived neurotrophic factor (MANF), a new player in endoplasmic reticulum diseases: structure, biology and therapeutic roles

Yeawon Kim, Sun-Ji Park, Ying Maggie Chen

PII: S1931-5244(17)30219-0

DOI: [10.1016/j.trsl.2017.06.010](https://doi.org/10.1016/j.trsl.2017.06.010)

Reference: TRSL 1167

To appear in: *Translational Research*

Received Date: 4 March 2017

Revised Date: 20 June 2017

Accepted Date: 23 June 2017

Please cite this article as: Kim Y, Park S-J, Chen YM, Mesencephalic astrocyte-derived neurotrophic factor (MANF), a new player in endoplasmic reticulum diseases: structure, biology and therapeutic roles, *Translational Research* (2017), doi: 10.1016/j.trsl.2017.06.010.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Mesencephalic astrocyte-derived neurotrophic factor (MANF),
a new player in endoplasmic reticulum diseases: structure, biology and therapeutic roles**

Yeawon Kim*, Sun-Ji Park* and Ying Maggie Chen*
