Genomics of human fatty liver disease reveal mechanistically linked lipid droplet associated gene regulations in blunt steatosis and NASH

Nishika Sahini, Jürgen Borlak

PII: S1931-5244(16)30096-2

DOI: [10.1016/j.trsl.2016.06.003](https://doi.org/10.1016/j.trsl.2016.06.003)

Reference: TRSL 1056

To appear in: *Translational Research*

Received Date: 26 March 2016

Revised Date: 13 May 2016

Accepted Date: 8 June 2016

Please cite this article as: Sahini N, Borlak J, Genomics of human fatty liver disease reveal mechanistically linked lipid droplet associated gene regulations in blunt steatosis and NASH, *Translational Research* (2016), doi: 10.1016/j.trsl.2016.06.003.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Genomics of human fatty liver disease reveal
mechanistically linked lipid droplet associated gene
regulations in blunt steatosis and NASH**

Running title: Genomics of NAFLD
