DISCLAIMER: This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our subscribers we are providing this early version of the article. The paper will be copy edited and typeset, and proof will be reviewed before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to The Journal pertain.

Embargo Policy

All article content is under embargo until uncorrected proof of the article becomes available online.

We will provide journalists and editors with full-text copies of the articles in question prior to the embargo date so that stories can be adequately researched and written. The standard embargo time is 12:01 AM ET on that date. Questions regarding embargo should be directed to jumedia@elsevier.com.

Title: Comparison of biochemical recurrence free survival after radical prostatectomy triggered by grade reclassification on active surveillance, and men newly diagnosed with similar grade disease

Authors: Clarissa P. Diniz¹, Patricia Landis¹, H. Ballentine Carter¹, Jonathan I. Epstein^{1,2}, Mufaddal Mamawala¹

Affiliations: Departments of Urology¹ and Pathology², The Johns Hopkins University School of Medicine, The James Brady Urological Institute, Johns Hopkins Hospital, Baltimore, MD

Research Support: None
