This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ESTIMATING SYSTEMIC EXPOSURE TO LEVONORGESTREL
FROM AN ORAL CONTRACEPTIVE

Cale N BASARABA, MPH¹
Carolyn L WESTHOFF, MD¹
Malcolm C PIKE, PhD²

Competing Interest Statement: C.L.W. is a paid consultant to Merck and Bayer, both of which manufacture oral contraceptives; however, not the oral contraceptive evaluated in this study. The remaining authors report no financial relationships with any organizations that might have an interest in the submitted work and no other relationships or activities that could appear to have influenced the submitted work.

Financial support: This pilot study was funded by the Howard Solomon Research Fund and an Irving Institute for Clinical and Translational Research (ICTR) Collaborative and Multidisciplinary Pilot Research (CaMPR) Award. The Biomarkers Core Laboratory of the ICTR supported the assays. M.C.P. is partially supported by the NCI under award number P30CA008748 (PI: C. Thompson) to Memorial Sloan Kettering Cancer Center. This study was also supported by the National Center for Advancing Translational Sciences, National Institutes of Health (NIH), through Grant Number UL1 TR000040, formerly the National Center for Research Resources, Grant Number UL1 RR024156. The content is solely the responsibility of the authors and does not necessarily represent the official views of the NIH.
