This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title:

Impact of Estrogen Type on Cardiovascular Safety of Combined Oral Contraceptives

Authors:

Jürgen Dinger*, *M.D., Ph.D.*, Thai Do Minh**, *Ph.D.*, Klaas Heinemann**, *M.D., Ph.D.*

*Pharmacoepidemiology Berlin, Germany

**ZEG - Berlin Center for Epidemiology and Health Research, Berlin, Germany.

Funding: Unconditional grant from Bayer AG, Germany

Conflict of Interest: The study was funded by a manufacturer of hormonal contraceptives. The study was supervised by an independent Safety Monitoring and Advisory Council with full authority over the study (including study protocol, protocol amendments, data analysis, and stopping the study). The funder had no access to the source data and did not participate in designing the study or analyzing the data.

Registration Number at the clinical trials registry of the US National Library of Medicine: NCT01009684 (Please note: This is not a clinical trial.)

Word Count: Abstract, 241 words; Text, 6393 words

Keywords: VTE; ATE; Combined oral contraceptives; Prospective cohort study; Dienogest; Estradiol valerate; Routine clinical practice

Running Title: Impact of estrogen type on cardiovascular safety of COCs
