Title: In-vitro study of gonadotrophin signaling pathways in human granulosa cells in relation to progesterone receptor expression

Author: Soledad Henríquez, Paulina Kohen, Alex Muñoz, Ana Godoy, Felipe Orge, Jerome F Strauss III, Luigi Devoto

PII: S1472-6483(17)30264-X
DOI: <http://dx.doi.org/doi: 10.1016/j.rbmo.2017.06.011>
Reference: RBMO 1767

To appear in: *Reproductive BioMedicine Online*

Received date: 24-11-2016
Revised date: 31-5-2017
Accepted date: 2-6-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Short title: Progesterone-receptor-mediated matrix metalloproteinase expression

In-vitro study of gonadotrophin signaling pathways in human granulosa cells in relation to progesterone receptor expression
