Key message

The current systematic review and meta-analysis combined data from 22 studies evaluating the perinatal outcomes in twin pregnancies following multifetal pregnancy reduction compared with non-reduced twins. Fetal reduction of triplets to twins was found to be associated with comparable perinatal outcomes to that of non-reduced twins.

Yaniv Zipori is an accredited Obstetrician and Gynecologist from the Rambam Health Care Campus, Haifa, Israel, as well as a Fellow of the Australian and New Zealand
