This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Title**

Risk of treatment-related toxicities from *EGFR* tyrosine kinase inhibitors:  
a meta-analysis of clinical trials of gefitinib, erlotinib and afatinib in  
advanced *EGFR*-mutated non-small-cell lung cancer

Presented in part at the 15th World Conference on Lung Cancer, Sydney, Australia,  
October 27-30, 2013
