

Accepted Manuscript

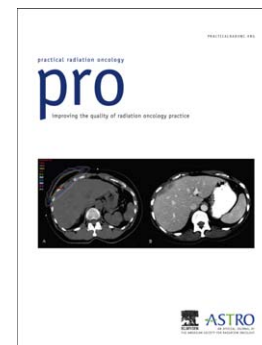

Real time intraoperative evaluation of implant quality and dose correction during prostate brachytherapy consistently improves target coverage using a novel image fusion and optimization program

Michael J. Zelefsky, Gilad N. Cohen, Amandeep S. Taggar, Marisa Kollmeier, Sean McBride, Gig Mageras, Marco Zaider

PII: S1879-8500(17)30009-7
DOI: doi: [10.1016/j.prro.2017.01.009](https://doi.org/10.1016/j.prro.2017.01.009)
Reference: PRRO 725

To appear in: *Practical Radiation Oncology*

Received date: 2 November 2016
Revised date: 6 January 2017
Accepted date: 16 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Clinical Investigation

Real time intraoperative evaluation of implant quality and dose correction during prostate brachytherapy consistently improves target coverage using a novel image fusion and optimization program

*Michael J. Zelefsky, MD, Gilad N. Cohen, MS, Amandeep S. Taggar, MD, Marisa Kollmeier, MD, Sean McBride, MD, Gig Mageras, PhD, Marco Zaider, PhD

Department of Radiation Oncology, Department of Medical Physics, Memorial Sloan Kettering Cancer Center, New York, NY, USA

Short title: Real Time Adaptive Therapy for Prostate Brachytherapy

Conflicts of interest: None
