Aqueous humor tyrosinase activity is indicative of iris melanocyte toxicity

Sarmistha Mahanty, Ankush A. Kawali, Shruthi Shirur Dakappa, Padmamalini Mahendradas, Mathew Kurian, Varun Kharbanda, Rohit Shetty, Subba Rao Gangi Setty

PII: S0014-4835(16)30529-2

DOI: [10.1016/j.exer.2017.07.006](https://doi.org/10.1016/j.exer.2017.07.006)

Reference: YEXER 7166

To appear in: *Experimental Eye Research*

Received Date: 8 December 2016

Revised Date: 12 April 2017

Accepted Date: 12 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Aqueous humor tyrosinase activity is indicative of iris melanocyte toxicity

Running title: Measurement of aqueous tyrosinase activity

Abbreviations

FQL, fluoroquinolone; TYR, tyrosinase; TYR^M, mushroom tyrosinase; L-DOPA, L-3,4-dihydroxyphenylalanine; AC tap, anterior chamber tap; BAK, benzalkonium chloride; BADI, bilateral acute depigmentation of the iris and BAIT, bilateral acute iris transillumination.
