

Accepted Manuscript

The wavelength composition and temporal modulation of ambient lighting strongly affect refractive development in young tree shrews

Timothy J. Gawne, John T. Siegwart, Jr., Alexander H. Ward, Thomas T. Norton

PII: S0014-4835(16)30306-2

DOI: [10.1016/j.exer.2016.12.004](https://doi.org/10.1016/j.exer.2016.12.004)

Reference: YEXER 7073

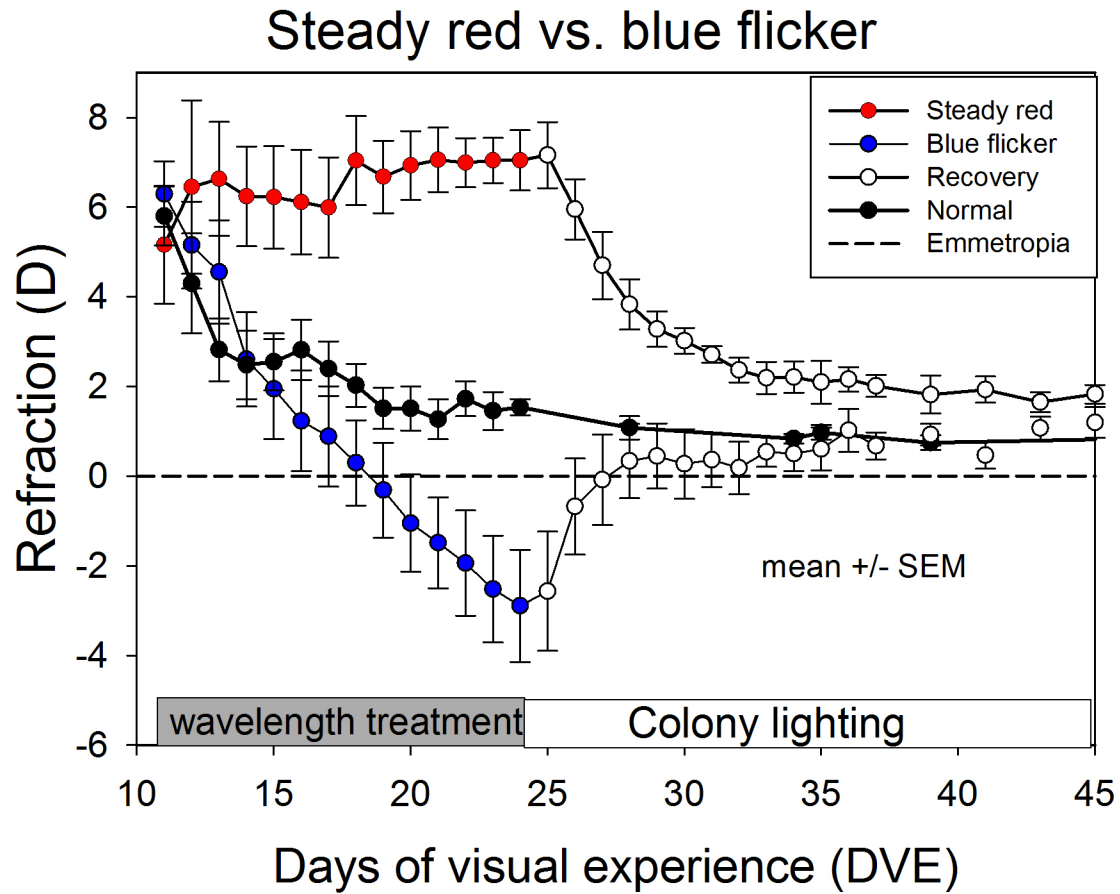

To appear in: *Experimental Eye Research*

Received Date: 29 September 2016

Accepted Date: 5 December 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
