BAX to basics: How the *BCL2* gene family controls the death of retinal ganglion cells

Margaret E. Maes, Cassandra L. Schlamp, Robert W. Nickells

PII: S1350-9462(16)30076-3

DOI: [10.1016/j.preteyeres.2017.01.002](https://doi.org/10.1016/j.preteyeres.2017.01.002)

Reference: JPRR 655

To appear in: *Progress in Retinal and Eye Research*

Received Date: 24 October 2016

Revised Date: 22 December 2016

Accepted Date: 3 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

BAX to Basics: How the *BCL2* gene family controls the death of retinal ganglion cells
