

Accepted Manuscript

Single-limb drop landing biomechanics in active individuals with and without a history of anterior cruciate ligament reconstruction: A total support analysis

Federico Pozzi, Stephanie Di Stasi, Joseph A Zeni, Joaquin A Barrios

PII: S0268-0033(17)30031-1
DOI: doi: [10.1016/j.clinbiomech.2017.01.020](https://doi.org/10.1016/j.clinbiomech.2017.01.020)
Reference: JCLB 4281
To appear in: *Clinical Biomechanics*
Received date: 23 June 2016
Accepted date: 30 January 2017

Please cite this article as: Federico Pozzi, Stephanie Di Stasi, Joseph A Zeni, Joaquin A Barrios, Single-limb drop landing biomechanics in active individuals with and without a history of anterior cruciate ligament reconstruction: A total support analysis. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Jclb*(2017), doi: [10.1016/j.clinbiomech.2017.01.020](https://doi.org/10.1016/j.clinbiomech.2017.01.020)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Single-limb drop landing biomechanics in active individuals with and without a history of anterior
cruciate ligament reconstruction: a total support analysis**
