Full can test: Mechanisms of a positive test in patients with shoulder pain

Mark K Timmons, Sevgi S Yesilyaprak, Jeff Ericksen, Lori A Michener

PII: S0268-0033(16)30232-7
DOI: doi: [10.1016/j.clinbiomech.2016.12.011](https://doi.org/10.1016/j.clinbiomech.2016.12.011)
Reference: JCLB 4258
To appear in: *Clinical Biomechanics*
Received date: 11 August 2016
Accepted date: 21 December 2016

Please cite this article as: Mark K Timmons, Sevgi S Yesilyaprak, Jeff Ericksen, Lori A Michener , Full can test: Mechanisms of a positive test in patients with shoulder pain. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Jclb(2016), doi: [10.1016/j.clinbiomech.2016.12.011](https://doi.org/10.1016/j.clinbiomech.2016.12.011)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Full can test: mechanisms of a positive test in patients with shoulder pain.
