Identification of potential compensatory muscle strategies in a breast cancer survivor population: A combined computational and experimental approach

Jaclyn N. Chopp-Hurley, Rebecca L. Brookham, Clark R. Dickerson

PII: S0268-0033(16)30191-7
DOI: doi:[10.1016/j.clinbiomech.2016.10.015](https://doi.org/10.1016/j.clinbiomech.2016.10.015)
Reference: JCLB 4237

To appear in: *Clinical Biomechanics*

Received date: 24 July 2015
Accepted date: 29 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Identification of potential compensatory muscle strategies in a breast cancer survivor
population: A combined computational and experimental approach**
