

## Accepted Manuscript

Acute effects of direct inhibitory pressure over the *biceps brachii* myotendinous junction on skeletal muscle activation and force output

Emiliano Cè, Stefano Longo, Emily McCoy, Angela Valentina Bisconti, Davide Tironi, Eloisa Limonta, Susanna Rampichini, Marco Rabuffetti, Fabio Esposito

PII: S1050-6411(17)30141-4

DOI: <http://dx.doi.org/10.1016/j.jelekin.2017.08.002>

Reference: JJEK 2101

To appear in: *Journal of Electromyography and Kinesiology*

Received Date: 12 April 2017

Revised Date: 27 July 2017

Accepted Date: 8 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
