Title: Prognostic Determinants and Treatment Outcomes Analysis of Osteosarcoma and Ewing Sarcoma of the Spine

Author: Armin Arshi, Justin Sharim, Don Y. Park, Howard Y. Park, Hamed Yazdanshenas, Nicholas M. Bernthal, Arya N. Shamie

PII: S1529-9430(16)31062-2
DOI: <http://dx.doi.org/doi: 10.1016/j.spinee.2016.11.002>
Reference: SPINEE 57200

To appear in: *The Spine Journal*

Received date: 11-7-2016
Revised date: 26-10-2016
Accepted date: 9-11-2016

32 **ABSTRACT**

33

34 **BACKGROUND CONTEXT:** Osteosarcoma (OGS) and Ewing sarcoma (EWS) are the two

35 classic primary malignant bone tumors. Due to the rarity of these tumors, evidence on

36 demographics, survival determinants, and treatment outcomes for primary disease of the spine

37 are limited and derived from small case series.
