Title: Defining the number and type of fixation anchors for optimal main curve correction in posterior surgery for adolescent idiopathic scoliosis

Author: Jean-Marc Mac-Thiong, Sameh Ibrahim, Stefan Parent, Hubert Labelle

PII: S1529-9430(16)31096-8
DOI: <http://dx.doi.org/doi: 10.1016/j.spinee.2016.11.012>
Reference: SPINEE 57210

To appear in: *The Spine Journal*

Received date: 16-6-2016
Revised date: 31-10-2016
Accepted date: 14-11-2016

26 **Abstract**

27 Background Context: The number and type of fixation anchors to use during posterior surgery for
28 adolescent idiopathic scoliosis (AIS) is still debated, and the relationship with curve correction
29 remains unclear.
