This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A carboxymethylcellulose/heparin combination for the prevention of Surgical
Adhesions

James R. Docherty¹ & P. Aiden McCormick²

¹Department of Physiology, Royal College of Surgeons in Ireland, 123 St.
Stephen's Green, Dublin 2, Ireland; ² Liver Unit, St. Vincent's University Hospital,
Dublin 4, Ireland.

docherty@rcsi.ie;

a.mccormick@ucd.ie

Both authors contributed to the planning and funding of the project, and
contributed to the experimental work, data analysis and writing of the
manuscript. Both authors approved the manuscript.

Short title: Surgical Adhesions, a Novel Therapy

Key Words: adhesions; surgical adhesions; heparin, carboxymethylcellulose;
lipactin
