Non taste exposure techniques to increase fruit and vegetable acceptance in children: Effects of task and stimulus type

H. Coulthard, S. Ahmed

PII: S0950-3293(17)30094-0

DOI: <http://dx.doi.org/10.1016/j.foodqual.2017.04.012>

Reference: FQAP 3313

To appear in: *Food Quality and Preference*

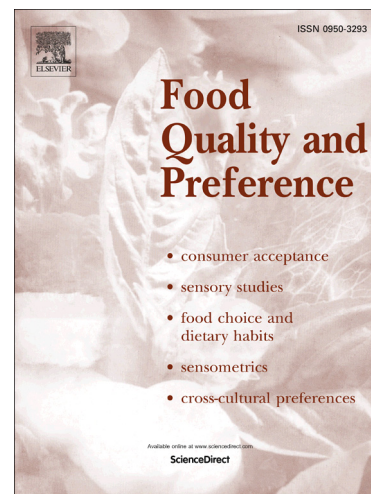

Received Date: 11 November 2016

Revised Date: 25 April 2017

Accepted Date: 26 April 2017

Please cite this article as: Coulthard, H., Ahmed, S., Non taste exposure techniques to increase fruit and vegetable acceptance in children: Effects of task and stimulus type, *Food Quality and Preference* (2017), doi: <http://dx.doi.org/10.1016/j.foodqual.2017.04.012>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Non taste exposure techniques to increase fruit and vegetable acceptance in children:**
2 **Effects of task and stimulus type**
