Title: Cellular Mechanisms of Peroxynitrite-Induced Neuronal Death

Authors: Kristina Ramdial, Maria Clara Franco, Alvaro G. Estevez

PII: S0361-9230(17)30274-5
DOI: <http://dx.doi.org/doi:10.1016/j.brainresbull.2017.05.008>
Reference: BRB 9221

To appear in: *Brain Research Bulletin*

Received date: 16-11-2016
Revised date: 21-4-2017
Accepted date: 12-5-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Cellular Mechanisms of Peroxynitrite-Induced Neuronal Death

Kristina Ramdial, Maria Clara Franco[#], Alvaro G. Estevez^{*#}

Corvallis, OR 97331

Highlights

- Peroxynitrite stimulates a different cell death types depending on the cell type and concentration of the oxidant
- Low concentration of peroxynitrite activated cell death signaling pathways leading to apoptosis
- High concentration of peroxynitrite stimulated necrosis
- Peroxynitrite can activate different types of cell death in the same cell type such as apoptosis and parthanatos in cortical neurons
