Research report

High-potential defense mechanisms of neocortex in a rat model of transient asphyxia induced cardiac arrest

Gerburg Keilhoff, Torben Esser, Maximilian Titze, Uwe Ebmeyer, Lorenz Schild

PII: S0006-8993(17)30354-2

DOI: <http://dx.doi.org/10.1016/j.brainres.2017.08.018>

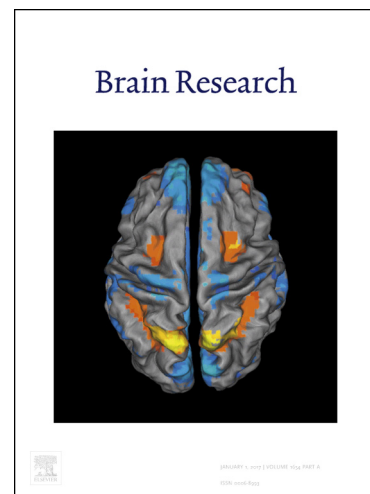

Reference: BRES 45460

To appear in: *Brain Research*

Received Date: 7 June 2017

Revised Date: 24 July 2017

Accepted Date: 14 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

High-potential defense mechanisms of neocortex in a rat model of transient asphyxia induced cardiac arrest
