

## Accepted Manuscript

Unintentional force changes in cyclical tasks performed by an abundant system:  
Empirical observations and a dynamical model

Sasha Reschechtko, Fariba Hasanbarani, Vladimir M. Akulin, Mark L. Latash

PII: S0306-4522(17)30180-X  
DOI: <http://dx.doi.org/10.1016/j.neuroscience.2017.03.022>  
Reference: NSC 17666

To appear in: *Neuroscience*

Received Date: 20 October 2016  
Revised Date: 9 March 2017  
Accepted Date: 14 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Unintentional force changes in cyclical tasks performed by an abundant system: Empirical observations and a dynamical model**
