This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Contribution of synaptic plasticity in the insular cortex to chronic pain

Department of Physiology, Faculty of Medicine, University of Toronto, 1 King's College Circle, Toronto, Ontario M5S 1A8, Canada

Center for Neuron and Disease, Frontier Institutes of Science and Technology, Xi'an Jiaotong University, Xi'an, 710049, China.

Centre for the study of Pain, University of Toronto, Ontario M5S 1A8, Canada

Key word: insular cortex; synaptic plasticity; long-term potentiation; chronic pain; long-term depression; adenylyl cyclase; mice
