

## Accepted Manuscript

Title: Cognitive Deficits Induced by Combined Exposure of Stress and Alcohol Mediated through Oxidative Stress-PARP Pathway in the Hippocampus

Authors: Rajat Pant, Ashok Jangra, Mohit Kwatra, Tavleen Singh, Pawan Kushwah, Babul Kumar Bezbaruah, Satendra Singh Gurjar, Swopna Phukan

PII: S0304-3940(17)30456-1  
DOI: <http://dx.doi.org/doi:10.1016/j.neulet.2017.05.058>  
Reference: NSL 32865

To appear in: *Neuroscience Letters*

Received date: 4-3-2017  
Revised date: 13-5-2017  
Accepted date: 25-5-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**HIGHLIGHTS**

- Restraint stress increases alcohol consumption in mice.
- Combined exposure of alcohol and stress aggravates memory deficits.
- Oxidative stress-PARP cascade gets activated in alcohol and stress-exposed mice.
- 1,5-isoquinolinediol ameliorates alcohol and stress-induced memory deficits.
