Title: Levodopa improves learning and memory ability on global cerebral ischemia-reperfusion injured rats in the Morris water maze test.

Author: Wenzhu Wang Lixu Liu Peng Jiang Chen Chen Tong Zhang

PII: S0304-3940(16)30868-0
DOI: <http://dx.doi.org/doi:10.1016/j.neulet.2016.11.026>
Reference: NSL 32428

To appear in: *Neuroscience Letters*

Received date: 5-9-2016
Revised date: 1-11-2016
Accepted date: 10-11-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Levodopa has beneficial and harmful effects during ischemia-reperfusion injury.
- It could shorten the duration of coma in rats after global cerebral ischemia-reperfusion injury.
- It could improve activity, memory, and learning capacities of the rats in the ischemia-reperfusion injury.
