Title: Mitochondrial transcription factor A (TFAM) rs1937 and AP endonuclease 1 (APE1) rs1130409 alleles are associated with reduced cognitive performance

Authors: Meryl S. Lillenes, Mari Støen, Clara-Cecilie Günther, Per Selnes, Vidar T.V. Stenset, Thomas Espeseth, Ivar Reinvang, Tormod Fladby, Tone Tønjum

PII: S0304-3940(17)30178-7
DOI: <http://dx.doi.org/doi:10.1016/j.neulet.2017.02.062>
Reference: NSL 32674

To appear in: *Neuroscience Letters*

Received date: 16-12-2016
Revised date: 15-2-2017
Accepted date: 22-2-2017

Please cite this article as: Meryl S.Lillenes, Mari Støen, Clara-Cecilie Günther, Per Selnes, Vidar T.V.Stenset, Thomas Espeseth, Ivar Reinvang, Tormod Fladby, Tone Tønjum, Mitochondrial transcription factor A (TFAM) rs1937 and AP endonuclease 1 (APE1) rs1130409 alleles are associated with reduced cognitive performance, *Neuroscience Letters* <http://dx.doi.org/10.1016/j.neulet.2017.02.062>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Mitochondrial transcription factor A (TFAM) rs1937 and AP endonuclease 1 (APE1) rs1130409 alleles are associated with reduced cognitive performance
