Title: Effects of preweaning environmental enrichment on hippocampus-dependent learning and memory in developing rats

Author: Cheng-Qiu Lu Le Zhong Chong-Huai Yan Ying Tian
Xiao-Ming Shen

PII: S0304-3940(16)31001-1
DOI: <http://dx.doi.org/doi:10.1016/j.neulet.2016.12.053>
Reference: NSL 32522

To appear in: *Neuroscience Letters*

Received date: 30-6-2015
Revised date: 6-12-2016
Accepted date: 21-12-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Effects of preweaning environmental enrichment on hippocampus-dependent
learning and memory in developing rats**

Highlights

- Preweaning EE enhances exploratory activity in developing rats.
- Preweaning EE enhances learning and memory in developing rats.
- Preweaning EE increases the levels of p-ERK1, p-ERK2 and ARC.
