This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Genetic Variants in the Peripheral Auditory System Significantly Affect Adult Cochlear Implant Performance

A Eliot Shearer^a, Robert W Eppsteiner^{a,#}, Kathy Frees^a, Viral Tejani^a, Christina M Sloan-Heggen^a, Carolyn Brown^{a,b}, Paul Abbas^{a,b}, Camille Dunn^a, Marlan R Hansen^a, Bruce J Gantz^a, Richard J.H. Smith^{a,c,d^}

a Department of Otolaryngology—Head & Neck Surgery, University of Iowa Carver College of Medicine, Iowa City, Iowa, USA

b Department of Communication Sciences & Disorders, University of Iowa, Iowa City, Iowa, USA

c Interdepartmental PhD Program in Genetics, University of Iowa, Iowa City, Iowa, USA

d Department of Molecular Physiology & Biophysics, University of Iowa College of Medicine, Iowa City, Iowa, USA

Current address: Ear, Nose & Throat Surgeons of Western Massachusetts, Northampton, MA

^ To whom correspondence should be addressed

Keywords: Cochlear implant, deafness, genetics, genomics

Word Count: 2,684 (Max word count 2,500)

Number of Figures: 2

Number of Tables: 2 (max = 4 figures/tables)

Target Journals: Hearing Research
