

## Accepted Manuscript

Quantitative contamination assessment of *Escherichia coli* in baby spinach primary production in Spain: Effects of weather conditions and agricultural practices

Irene Castro-Ibáñez, Liesbeth Jacxsens, Roland Lindqvist, María Isabel Gil, Mieke Uyttendaele, Ana Allende

PII: S0168-1605(17)30296-9  
DOI: doi: [10.1016/j.ijfoodmicro.2017.06.027](https://doi.org/10.1016/j.ijfoodmicro.2017.06.027)  
Reference: FOOD 7624

To appear in: *International Journal of Food Microbiology*

Received date: 15 May 2015

Revised date: 22 April 2017

Accepted date: 26 June 2017

Please cite this article as: Irene Castro-Ibáñez, Liesbeth Jacxsens, Roland Lindqvist, María Isabel Gil, Mieke Uyttendaele, Ana Allende , Quantitative contamination assessment of *Escherichia coli* in baby spinach primary production in Spain: Effects of weather conditions and agricultural practices, *International Journal of Food Microbiology* (2017), doi: [10.1016/j.ijfoodmicro.2017.06.027](https://doi.org/10.1016/j.ijfoodmicro.2017.06.027)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Running title: Contamination assessment of *E. coli* in leafy greens

**Quantitative contamination assessment of *Escherichia coli* in baby spinach  
primary production in Spain: Effects of weather conditions and agricultural  
practices**
