UV-driven hydroxyl radical oxidation of tris(2-chloroethyl) phosphate: Intermediate products and residual toxicity

Juan Liu, Jinshao Ye, Yifu Chen, Chongshu Li, Huase Ou

PII: S0045-6535(17)31536-9

DOI: [10.1016/j.chemosphere.2017.09.111](https://doi.org/10.1016/j.chemosphere.2017.09.111)

Reference: CHEM 19984

To appear in: *ECSN*

Received Date: 14 May 2017

Revised Date: 20 September 2017

Accepted Date: 23 September 2017

Please cite this article as: Liu, J., Ye, J., Chen, Y., Li, C., Ou, H., UV-driven hydroxyl radical oxidation of tris(2-chloroethyl) phosphate: Intermediate products and residual toxicity, *Chemosphere* (2017), doi: 10.1016/j.chemosphere.2017.09.111.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **UV-driven hydroxyl radical oxidation of tris(2-chloroethyl)**
2 **phosphate: Intermediate products and residual toxicity**
