Bioavailability of dissolved organic nitrogen (DON) in wastewaters from animal feedlots and storage lagoons

Jingyi Sun, Eakalak Khan, Senay Simsek, Jae-Bom Ohm, Halis Simsek

PII: S0045-6535(17)31203-1

DOI: [10.1016/j.chemosphere.2017.07.153](https://doi.org/10.1016/j.chemosphere.2017.07.153)

Reference: CHEM 19686

To appear in: *ECSN*

Received Date: 27 January 2017

Revised Date: 25 July 2017

Accepted Date: 28 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Animal feedlot
wastewater

Bioavailable DON
(ABDON)/Biodegradable
DON (BDON) assays

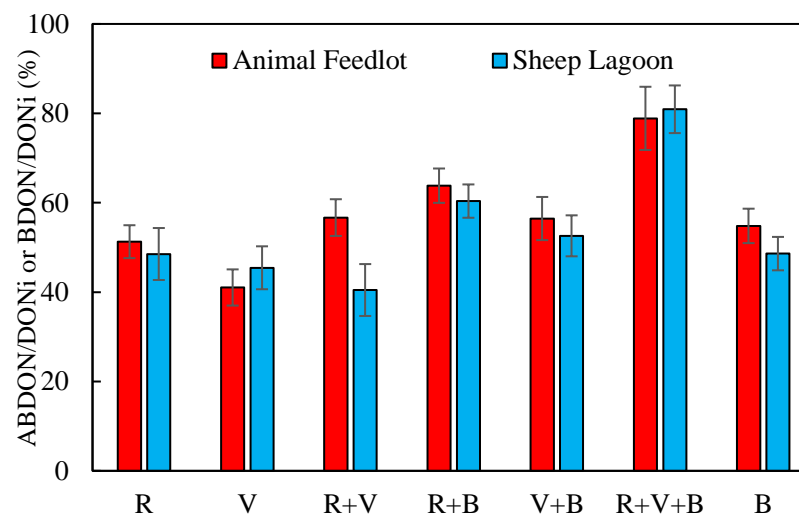

21 days of
incubation

Wastewater sample +
algae and/or bacteria

Sheep lagoon
wastewater

R: *Chlamydomonas reinhardtii*

V: *Chlorella vulgaris*

B: Bacteria
