Phytoremediation strategies for soils contaminated with heavy metals:
modifications and future perspectives

Nadeem Sarwar, Muhammad Imran, Muhammad Rashid Shaheen, Wajid Ishaq,
Asif Kamran, Amar Matloob, Abdur Rehim, Saddam Hussain

PII: S0045-6535(16)31857-4

DOI: 10.1016/j.chemosphere.2016.12.116

Reference: CHEM 18572

To appear in: *Chemosphere*

Received Date: 04 August 2016

Revised Date: 27 November 2016

Accepted Date: 22 December 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We discussed various sources and harmful effects of some important heavy metals and metalloids.
- We summarized the traditional phytoremediation strategies, and mechanisms involved in phytoremediation of metals.
- We highlighted the limitations and some recent advances in phytoremediation approach.
- We compared the traditional and advanced phytoremediation techniques for effective implications.
