Manuscript Number:

Title: Quantitative analysis of the extent of heavy-metal contamination in soils near Picher, Oklahoma, within the Tar Creek Superfund Site

Article Type: Research Paper

Section/Category: Environmental Chemistry

Keywords: heavy-metal contamination; soil chemistry; Picher; Tar Creek Superfund Site; Tri-State Mining District

Corresponding Author: L. Rex McAliley, Ph.D.

Corresponding Author's Institution: Northwest Missouri State University

First Author: Rachelle E. Beattie, M.S.

Order of Authors: Rachelle E. Beattie, M.S.; Wyatt Henke, B.S.; Conor Davis, B.S.; M. Abdul Mottaleb, Ph.D; James H. Campbell, Ph.D; and L. Rex McAliley, Ph.D.

Suggested Reviewers: Alejandro Carrillo-Chavez Ph.D.

Professor of Geochemistry, Centro de geociencias, UNAM Campus Juriquilla
ambiente@geociencias.unam.mx

He has ample experience with abandoned mine waste in Mexico.

Antonio Romero Ph.D.

Professor, Cristalografía, Mineralogía y Química Agrícola, Universidad de Sevilla, Spain
aromero@us.es

He has numerous published articles in characterization and remediation of acid mine drainage

Kenneth Clark Ph.D.

Professor Emeritus in Economic Geology, Geological Sciences, University of Texas El Paso
clark@geo.utep.edu

He has worked with mining resources and remediation of mining waste in Mexico.

Karen Hudson-Edwards Ph.D.

Professor, Environmental Geochemistry and Mineralogy, University of London
k.hudson-edwards@bbk.ac.uk

Expert in ore deposits and mining waste disposal and remediation
