Arsenic removal by electrocoagulation process: Recent trends and removal mechanism

P.V. Nidheesh, T.S. Anantha Singh

PII: S0045-6535(17)30617-3
DOI: 10.1016/j.chemosphere.2017.04.082
Reference: CHEM 19144
To appear in: *Chemosphere*

Received Date: 14 February 2017

Revised Date: 15 April 2017

Accepted Date: 18 April 2017

Please cite this article as: P.V. Nidheesh, T.S. Anantha Singh, Arsenic removal by electrocoagulation process: Recent trends and removal mechanism, *Chemosphere* (2017), doi: 10.1016/j.chemosphere.2017.04.082

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- ❖ Recent trends in arsenic removal by electrocoagulation are explained
- ❖ Arsenic removal mechanism of electrocoagulation process are described in detail
- ❖ Various sludge disposal methods are described
- ❖ Real-field implementation problems for electrocoagulation process are analyzed
