WRF prediction of two winter season Saharan dust events using PM₁₀ concentrations: Boundary versus initial conditions

Gregory S. Jenkins, Aminita Mbow Diokhane

PII: S1352-2310(17)30515-0

DOI: [10.1016/j.atmosenv.2017.08.010](https://doi.org/10.1016/j.atmosenv.2017.08.010)

Reference: AEA 15480

To appear in: *Atmospheric Environment*

Received Date: 10 January 2017

Revised Date: 26 June 2017

Accepted Date: 6 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **WRF prediction of two winter season Saharan dust events using PM₁₀**
2 **concentrations: boundary versus initial conditions**
